Professional Summary

Junior Data Analyst skilled in SQL, Excel, Power BI, Python, and data visualization. Experienced in cleaning and analyzing data, building dashboards, developing KPIs, and transforming raw data into clear business insights.

Technical Skills

- **Programming:** Python, SQL
- **Data Analytics:** Data Cleaning, Data Transformation, EDA, Data Processing, KPI Development, Business Intelligence, Reporting
- **Visualization:** Power BI, Excel Dashboards, PivotCharts, Tableau (Basic)
- **Databases:** PostgreSQL, MySQL
- **Excel:** PivotTables, PivotCharts, Slicers, Timelines, VLOOKUP/XLOOKUP, Conditional Formatting, Data Validation, IF Functions
- **Power BI:** Power Query, DAX, Star Schema, DimDate, Data Modeling, Time-Series Analysis, Geographic Analysis
- **Tools:** Git, GitHub, Google Sheets, VS Code, Jupyter Notebook, pgAdmin

Internship Experience

Junior Data Analyst Intern

Datavalley India Pvt. Ltd.

Dec 2025 – Jul 2026

Vijayawada, India

- Cleaned, validated, and prepared structured datasets to support downstream analysis and business reporting.
- Applied analytical and problem-solving techniques to identify data patterns, flag inconsistencies, and surface actionable insights.
- Collaborated on data processing and interpretation tasks, contributing to team-wide analytical reporting workflows.

Projects

Urban Mobility Intelligence: Traffic Accident & Road Safety Analytics

Power BI

[GitHub Repository](#)

- Built an end-to-end Power BI dashboard analyzing approximately 74,881 NYC traffic accident records using Power Query, DAX, and a star-schema data model.
- Designed KPIs for total accidents, injuries, fatalities, accident rates, and average injuries per accident.
- Investigated accident trends by month, day, weekend, borough, and location to surface actionable road safety patterns.

FNP Sales Analysis Dashboard

Microsoft Excel

[GitHub Repository](#)

- Built an interactive Excel dashboard to analyze revenue, orders, products, customers, occasions, cities, and sales trends.
- Leveraged PivotTables, PivotCharts, Slicers, Timelines, and advanced formulas to summarize and explore sales data.
- Identified top-performing products, high-revenue occasions, and seasonal sales patterns to support business decisions.

SQL Retail Sales Analysis

PostgreSQL

[GitHub Repository](#)

- Analyzed retail sales data using PostgreSQL to uncover sales trends, customer behavior, and category performance.
- Wrote CTEs, window functions, aggregate functions, CASE statements, and date functions to solve business questions.
- Identified top customers, high-value transactions, best-performing sales months, and customer activity across product categories.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2026

Krishna University Engineering & Technology

Certifications

- Certificate of Internship – Junior Data Analyst Intern, Datavalley India Pvt. Ltd. (ID: AP25S11102593)
- Microsoft Excel for Data Analysis
