## PROFESSIONAL SUMMARY

---

Junior Data Analyst skilled in SQL, Excel, Power BI, and Python, with hands-on experience cleaning and analyzing datasets ranging from 50,000 to 100,000+ rows. Experienced in writing production-style SQL (joins, CTEs, window functions), building interactive Power BI and Excel dashboards, and transforming raw, messy data into clear KPIs and actionable business insights.

## TECHNICAL SKILLS

---

**Programming:** Python, SQL

**Data Analytics:** Data Cleaning, Data Transformation, EDA, Data Processing, KPI Development, Business Intelligence, Reporting

**Visualization:** Power BI, Excel Dashboards, PivotCharts, Tableau (Basic)

**Databases:** PostgreSQL, MySQL

**Excel:** PivotTables, PivotCharts, Slicers, Timelines, VLOOKUP/XLOOKUP, Conditional Formatting, Data Validation, IF Functions

**Power BI:** Power Query, DAX, Star Schema, DimDate, Data Modeling, Time-Series Analysis, Geographic Analysis

**Tools:** Git, GitHub, Google Sheets, VS Code, Jupyter Notebook, pgAdmin

## INTERNSHIP EXPERIENCE

---

### Junior Data Analyst Intern

*Datavalley India Pvt. Ltd.*

**Dec 2025 – Jul 2026**

*Vijayawada, India · 8 months*

- Worked end-to-end on 3 primary datasets sourced from relational databases, ranging from approximately 50,000 to 100,000+ rows, writing SQL queries with JOINS, GROUP BYs, and CTEs to clean messy data, remove duplicates, and prepare analysis-ready tables.
- Built a Power BI dashboard analyzing ~74,881 traffic accident records as the primary deliverable, defining core KPIs — Total Accidents, Injury Rate, Fatality Rate, and Average Injuries per Accident — to help stakeholders track road-safety trends without manual reporting.
- Performed exploratory data analysis to identify trends, outliers, and inconsistencies across multiple datasets, and supported weekly reporting cycles, improving data accuracy and reducing manual cross-checking for the team.

## PROJECTS

---

### Urban Mobility Intelligence: Traffic Accident & Road Safety Analytics — *Power BI*

[GitHub Repository](#)

- Built an end-to-end Power BI dashboard analyzing approximately 74,881 NYC traffic accident records using Power Query, DAX, and a star-schema data model.
- Designed KPIs for total accidents, injuries, fatalities, accident rates, and average injuries per accident.
- Investigated accident trends by month, day, weekend, borough, and location to surface actionable road safety patterns.

### FNP Sales Analysis Dashboard — *Microsoft Excel*

[GitHub Repository](#)

- Built an interactive Excel dashboard to analyze revenue, orders, products, customers, occasions, cities, and sales trends.
- Leveraged PivotTables, PivotCharts, Slicers, Timelines, and advanced formulas to summarize and explore sales data.
- Identified top-performing products, high-revenue occasions, and seasonal sales patterns to support business decisions.

### SQL Retail Sales Analysis — *PostgreSQL*

[GitHub Repository](#)

- Analyzed retail sales data using PostgreSQL to uncover sales trends, customer behavior, and category performance.
- Wrote CTEs, window functions, aggregate functions, CASE statements, and date functions to solve business questions.
- Identified top customers, high-value transactions, best-performing sales months, and customer activity across product categories.

## EDUCATION

---

### Bachelor of Technology (B.Tech) – Computer Science and Engineering

*Krishna University Engineering & Technology*

2022 – 2026

CGPA: 7.8 / 10

## CERTIFICATIONS

---

- Certificate of Internship – Junior Data Analyst Intern, Datavalley India Pvt. Ltd. (ID: AP25S11102593)
- MySQL Developer — edX, Verified Certificate, Issued April 6, 2024 (Certificate ID: 25e76498e2b24f2ba1534b0eac429e9e)
- Power BI — Microsoft (Great Learning), Completed May 7, 2025
